Cities in a World Economy (Sociology for a New Century Series) Saskia Sassen

The **Fourth Edition** of **Cities in a World Economy** shows how certain characteristics of flows of money, information, and people have led to the emergence of a new social formation: global cities, new types of migrations, financial crises, environmental catastrophes, and the multiplication of communication technologies. These developments give new meaning to such fixtures of urban sociology as the centrality of place and the importance of geography in our social world.
