Waste Treatment in the Service and Utility Industries (Advances in Industrial and Hazardous Wastes Treatment)

Waste Treatment in the Service and Utility Industries (Advances in Industrial and Hazardous Wastes Treatment)

This volume provides in-depth coverage of environmental pollution sources, waste characteristics, control technologies, management strategies, facility innovations, process alternatives, costs, case histories, effluent standards, and future trends in the process industries. It delineates methodologies, technologies, and the regional and global effects of important pollution control practices. The authors focus on new developments in innovative and alternative technologies, design criteria, effluent standards, managerial decision methodology, and regional and global environmental conservation specific to process industries.
