Integrated Greenhouse Systems for Mild Climates: Climate Conditions, Design, Construction, Maintenance, Climate Control Christian von Zabeltitz

Crop production in greenhouses is a growing industry, especially in mild climates, and is very important for the population as a source of income and clean, fresh food. Greenhouses create optimal climate conditions for crop growth and protect crops from outside pests. At the same time greenhouse production increases water use efficiency and makes integrated production and protection (IPP) possible. This book provides technical instructions for practice (what to do and what not to do) and gives answers to the question: How to produce more clean crops and better quality with less water, less land and less pesticide. Suitable greenhouse constructions and their design, adapted to local climates in subtropical, tropical and arid regions and infrastructure conditions are presented. The necessary climate control measures - light transmittance, ventilation, cooling, heating, and CO₂ enrichment - and physical measures for pest control, as well as methods for using solar energy to desalinate salty water are described. The results of theoretical research are transferred into methods for practical use, so that readers are equipped to solve their problems in practice as well as to get stimulation for further research and development.

From reader reviews:

Donna Jost:

In this 21st centuries, people become competitive in each and every way. By being competitive now, people have do something to make them survives, being in the middle of the crowded place and notice by means of surrounding. One thing that oftentimes many people have underestimated that for a while is reading. Yeah, by reading a reserve your ability to survive raise then having chance to stand up than other is high. For you personally who want to start reading some sort of book, we give you that Integrated Greenhouse Systems for Mild Climates: Climate Conditions, Design, Construction, Maintenance, Climate Control book as nice and daily reading book. Why, because this book is greater than just a book.

Jonathan Ownby:

Are you kind of active person, only have 10 or even 15 minute in your day to upgrading your mind talent or thinking skill also analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your short time to read it because all this time you only find guide that need more time to be study. Integrated Greenhouse Systems for Mild Climates: Climate Conditions, Design, Construction, Maintenance, Climate Control can be your answer mainly because it can be read by a person who have those short free time problems.

Charles Aranda:

Reading a book for being new life style in this season; every people loves to learn a book. When you study a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your analysis, you can read education books, but if you want to entertain yourself read a fiction books, these kinds of us novel, comics, and also soon. The Integrated Greenhouse Systems for Mild Climates: Climate Conditions, Design, Construction, Maintenance, Climate Control will give you new experience in examining a book.

Rochelle Barrick:

You can find this Integrated Greenhouse Systems for Mild Climates: Climate Conditions, Design, Construction, Maintenance, Climate Control by browse the bookstore or Mall. Only viewing or reviewing it can to be your solve challenge if you get difficulties for the knowledge. Kinds of this e-book are various. Not only simply by written or printed but also can you enjoy this book by means of e-book. In the modern era including now, you just looking because of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose right ways for you.
