Mankind Child of the Stars Max H Flindt

Is Earth a colony established by creatures from Outerspace? Scientific evidence to prove that mankind could not possibly evolved naturally. Step by step clues that explore the very real possibility that we are direct descendants of ancient starmen who came from other planets to Earth millions of years ago. Some of the fascinating discoveries revealed in this book:* Earth has been visited more than 5,000 times by creatures from other planets! * There's evidence that starmen deliberately hid any "Missing Link" human fossils in order to keep mankind from knowing it was a colony! * There is a reason to believe that the starmen were the "Angels" of the Bible, carrying on a "Divine" mission to bring human life to Earth! Max H. Flindt was the first to scientifically document from biological evidence the possibility that mankind may be a hybrid from a prehistoric union of terrestrial humanoids and starmen. With a 180,000 copies previously sold, this new Edition of "Mankind" offers a whole new generation a look at these mind-expanding theories.
