Linear and Integer Optimization: Theory and Practice, Third Edition (Advances in Applied Mathematics) Gerard Sierksma, Yori Zwols

Presenting a strong and clear relationship between theory and practice, **Linear and Integer Optimization: Theory and Practice** is divided into two main parts. The first covers the theory of linear and integer optimization, including both basic and advanced topics. Dantzig's simplex algorithm, duality, sensitivity analysis, integer optimization models, and network models are introduced.

More advanced topics also are presented including interior point algorithms, the branch-and-bound algorithm, cutting planes, complexity, standard combinatorial optimization models, the assignment problem, minimum cost flow, and the maximum flow/minimum cut theorem.

The second part applies theory through real-world case studies. The authors discuss advanced techniques such as column generation, multiobjective optimization, dynamic optimization, machine learning (support vector machines), combinatorial optimization, approximation algorithms, and game theory.

Besides the fresh new layout and completely redesigned figures, this new edition incorporates modern examples and applications of linear optimization. The book now includes computer code in the form of models in the GNU Mathematical Programming Language (GMPL). The models and corresponding data files are available for download and can be readily solved using the provided online solver.

This new edition also contains appendices covering mathematical proofs, linear algebra, graph theory, convexity, and nonlinear optimization. All chapters contain extensive examples and exercises. This textbook is ideal for courses for advanced undergraduate and graduate students in various fields including mathematics, computer science, industrial engineering, operations research, and management science.

From reader reviews:

Troy Riley:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their leisure time with their family, or all their friends. Usually they carrying out activity like watching television, about to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Might be reading a book might be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to attempt look for book, may be the publication untitled Linear and Integer Optimization: Theory and Practice, Third Edition (Advances in Applied Mathematics) can be excellent book to read. May be it can be best activity to you.

Mary Wing:

This Linear and Integer Optimization: Theory and Practice, Third Edition (Advances in Applied Mathematics) is fresh way for you who has curiosity to look for some information because it relief your hunger of information. Getting deeper you into it getting knowledge more you know or you who still having tiny amount of digest in reading this Linear and Integer Optimization: Theory and Practice, Third Edition (Advances in Applied Mathematics) can be the light food to suit your needs because the information inside this particular book is easy to get by anyone. These books produce itself in the form which can be reachable by anyone, sure I mean in the e-book type. People who think that in book form make them feel tired even dizzy this guide is the answer. So there is absolutely no in reading a reserve especially this one. You can find actually looking for. It should be here for you. So , don't miss that! Just read this e-book kind for your better life and also knowledge.

Sheila Cyr:

As we know that book is essential thing to add our knowledge for everything. By a guide we can know everything we really wish for. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This publication Linear and Integer Optimization: Theory and Practice, Third Edition (Advances in Applied Mathematics) was filled with regards to science. Spend your spare time to add your knowledge about your research competence. Some people has various feel when they reading a book. If you know how big good thing about a book, you can really feel enjoy to read a publication. In the modern era like right now, many ways to get book you wanted.

Pamela Postma:

What is your hobby? Have you heard that will question when you got learners? We believe that that query was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person including reading or as reading become their hobby. You should know that reading is very important and also book as to be the factor. Book is important thing to incorporate you knowledge,

except your personal teacher or lecturer. You discover good news or update concerning something by book. Amount types of books that can you choose to adopt be your object. One of them is this Linear and Integer Optimization: Theory and Practice, Third Edition (Advances in Applied Mathematics).
