Cross-Cultural Scientific Exchanges in the Eastern Mediterranean, 1560-1660

Avner Ben-Zaken

Cross-Cultural Scientific Exchanges in the Eastern Mediterranean, 1560-1660 Avner Ben-Zaken

Avner Ben-Zaken reconsiders the fundamental question of how early modern scientific thought traveled between Western and Eastern cultures in the age of the so-called Scientific Revolution.

Through five meticulously researched case studies in which he explores how a single obscure object or text moved in the Eastern world, Ben-Zaken reveals the intricate ways that scientific knowledge moved across cultures. His diligent exploration traces the eastward flow of post-Copernican cosmologies and scientific discoveries, showing how these ideas were disseminated, modified, and applied to local cultures.

Never before has a student of scientific traffic in the Mediterranean taken such pains to see precisely which instruments, books, and ideas first appeared where, in whose hands, by what means, and with what implications. In doing so, Ben-Zaken challenges accepted views of Western primacy in this fruitful exchange. He shows not only how Islamic cultures benefited from European scientific knowledge but also how Eastern understanding of classical Greek texts informed developments in the West.

Ben-Zaken's mastery of different cultures and languages uniquely positions him to tell this intriguing story. His findings reshape our understanding of scientific discourse in this critical period and contribute to the growing field of cross-cultural Christian-Muslim studies.
