The Perception of Visual Information

William R. Hendee, Peter N.T. Wells

The Perception of Visual Information William R. Hendee, Peter N.T. Wells

The presentation and interpretation of visual information is essential to almost every activity in human life and most endeavors of modern technology. This book examines the current status of what is known (and not known) about human vision, how human observers interpret visual data, and how to present such data to facilitate their interpretation and use. Written by experts who are able to cross disciplinary boundaries, the book provides an educational pathway through several models of human vision; describes how the visual response is analyzed and quantified; presents current theories of how the human visual response is interpreted; discusses the cognitive responses of human observers; and examines such applications as space exploration, manufacturing, surveillance, earth and air sciences, and medicine. The book is intended for everyone with an undergraduate-level background in science or engineering with an interest in visual science. This second edition has been brought up to date throughout and contains a new chapter on "Virtual reality and augmented reality in medicine."

From reader reviews:

Sandra Murray:

Reading a book can be one of a lot of exercise that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new info. When you read a guide you will get new information mainly because book is one of several ways to share the information as well as their idea. Second, studying a book will make an individual more imaginative. When you reading a book especially fictional book the author will bring you to definitely imagine the story how the personas do it anything. Third, it is possible to share your knowledge to other individuals. When you read this The Perception of Visual Information, you may tells your family, friends along with soon about yours e-book. Your knowledge can inspire different ones, make them reading a guide.

Janet Magnuson:

Many people spending their time frame by playing outside with friends, fun activity using family or just watching TV all day every day. You can have new activity to enjoy your whole day by reading through a book. Ugh, ya think reading a book can actually hard because you have to take the book everywhere? It all right you can have the e-book, getting everywhere you want in your Smart phone. Like The Perception of Visual Information which is finding the e-book version. So , why not try out this book? Let's view.

Lori Roth:

Do you like reading a publication? Confuse to looking for your selected book? Or your book was rare? Why so many problem for the book? But any people feel that they enjoy for reading. Some people likes looking at, not only science book but also novel and The Perception of Visual Information as well as others sources were given understanding for you. After you know how the truly amazing a book, you feel need to read more and more. Science reserve was created for teacher or perhaps students especially. Those guides are helping them to add their knowledge. In some other case, beside science reserve, any other book likes The Perception of Visual Information to make your spare time much more colorful. Many types of book like here.

Mark Bunnell:

What is your hobby? Have you heard that will question when you got learners? We believe that that issue was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. So you know that little person like reading or as reading become their hobby. You must know that reading is very important along with book as to be the point. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You see good news or update with regards to something by book. Many kinds of books that can you go onto be your object. One of them is The Perception of Visual Information.
