## Diabetic Nephropathy

This volume will focus on and emphasise the clinical relevance of diabetic nephropathy, a relatively common problem of diabetes. It affects about one in three patients with Type 1 diabetes, and left untreated can lead to a progressive decline in renal function, accompanied by retinopathy and arterial hypertension, which, in turn, leads to cardiovascular disease - a common cause of death in these patients. Diabetic Nephropathy will also provide the reader with a solid grounding in current basic and clinical research.
