A New Ecology: Systems Perspective Sven Erik Jørgensen, Brian Fath, Simone Bastianoni, Joao C. Marques, Felix Muller, S. Nors Nielsen, Bernard D. Patten, Enzo Tiezzi, Robert E. Ulanowicz

A New Ecology presents an ecosystem theory based on the following ecosystem properties: physical openness, ontic openness, directionality, connectivity, a complex dynamic for growth and development, and a complex dynamic response to disturbances. Each of these properties is developed in detail to show that these basic and characteristic properties can be applied to explain a wide spectrum of ecological observations and conceptions. It is also shown that the properties have application for environmental management and for assessment of ecosystem health.

- * Demonstrates an ecosystem theory that can be applied to explain ecological observations and rules
- * Presents an ecosystem theory based upon a systems approach
- * Discusses an ecosystem theory that is based on a few basic properties that are characteristic for ecosystems
