## **Current Topics in Biotechnology** C.P. Malik, Bhavneet Kaur, Chitra Wadhvani

The field of biotechnology has revolutionized the concepts in agriculture, food, industrial feed stocks and health care in the past three decades. It has furnished new tools and techniques to enhance the agricultural productivity, raise value-added products and health care systems and has ensured better environments. Over the years it has exploited biological systems at all levels of complexity or organisations for improving the life of common man. Scientific breakthroughs in gene expression, protein engineering, and drug designing, animal health care, industrial chemistry, preservation of biodiversity and cell fusion are being increasingly translated into new products and services. Rapid advances in different areas of biotechnology have ushered tremendous changes in agriculture, medicine and cell biology.

The present book *Current Topics in Biotechnology* incorporates reviews articles on varied aspects of biotechnology. The volume contains 10 chapters written by experts in the disciplines, Dr. Edison T Liu, Executive Director of the Genome Institute of Singapore has briefly discussed "What is next in biotechnology?" Dr Weichang Yu and Dr James A. Birchler have reviewed "Minichromosomes: The next generation technology for plant genetic engineering". Dr V S Hanur, Indian Institute of Horticultural Research, Hesaraghatta, Bangalore has reviewed the pertinent information on Plant stem cells: Molecular biology and Biotechnology.

Sonali Chadha discusses Cloning Vectors: the vehicles of genetic engineering. Dr Dapinder Bakshi and J K Arora (Add Director, Biotechnology, PSCST, Chandigarh) have made excellent attempt to present a succinct review on GENETICALLY MODIFIED CROPS IN INDIAN PERSPECTIVE. Considering that cotton fiber biology is important for describing, defining and refining fundamental questions in the fields of cell and developmental biology, Prof. C P Malik, Dr Bhavneet Kaur, Chitra Wadhvani and Aman Verma have discussed the Mechanism of cotton fiber development.

Prof. C P Malik, Aman Verma, Chitra Wadhvani and Bhavneet Kaur (Dr) have made indepth survey and reviewed the pertinent literature on bt cotton and its coomerical use. Prof C P Malik and his colleagues have compiled recent literature on the technique especially molecular biology of fruit ripening. The chapter on prions; THE LETHAL PROTEINS by Chitra Wadhvani and C P Malik is aimed at looking at the prion diseases from a molecular point of view. taking into account the genetic as well as the transmissible and spordic aspect of the disease.

THE ROLE OF BIOTECHNOLOGY IN PROLONGING THE SHELF LIFE OF FRUITS. dRS. S P Vyas and Amit K Goyal have done extremely fascinathing job to review the available literature on PLANT DERIVED EDIBLE VACCINES. The present volume is a must for all science libraries catering to the needs of postgraduate students and doctoral scholars: to the teachers and students engaged in teaching and research in biotechnology, Physiology and plant sciences, Agriculture, plant breeding, Animal breeding. The book will serve as an excellent reference source for advanced topics in Biotechnology.

### **From reader reviews:**

#### **Eloisa Hurd:**

Have you spare time for any day? What do you do when you have considerably more or little spare time? Yes, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a wander, shopping, or went to the particular Mall. How about open or maybe read a book entitled Current Topics in Biotechnology? Maybe it is to get best activity for you. You know beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with their opinion or you have various other opinion?

#### **Frankie Graybill:**

Book is to be different for each grade. Book for children until eventually adult are different content. To be sure that book is very important for us. The book Current Topics in Biotechnology had been making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The book Current Topics in Biotechnology is not only giving you much more new information but also being your friend when you feel bored. You can spend your current spend time to read your reserve. Try to make relationship while using book Current Topics in Biotechnology. You never truly feel lose out for everything when you read some books.

#### **Martha Holt:**

This Current Topics in Biotechnology is new way for you who has attention to look for some information as it relief your hunger details. Getting deeper you in it getting knowledge more you know or you who still having small amount of digest in reading this Current Topics in Biotechnology can be the light food for you personally because the information inside that book is easy to get by simply anyone. These books build itself in the form which can be reachable by anyone, that's why I mean in the e-book application form. People who think that in e-book form make them feel sleepy even dizzy this guide is the answer. So there is no in reading a book especially this one. You can find actually looking for. It should be here for a person. So , don't miss the idea! Just read this e-book type for your better life and also knowledge.

#### **Adriana Cornell:**

As we know that book is very important thing to add our know-how for everything. By a reserve we can know everything we really wish for. A book is a list of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This reserve Current Topics in Biotechnology was filled concerning science. Spend your spare time to add your knowledge about your technology competence. Some people has diverse feel when they reading some sort of book. If you know how big selling point of a book, you can sense enjoy to read a publication. In the modern era like today, many ways to get book that you just wanted.
