Lectures on Mean Curvature Flows (Ams/Ip Studies in Advanced Mathematics) Xi-Ping Zhu
'Mean curvature flow' is a term that is used to describe the evolution of a hyper surface whose normal velocity is given by the mean curvature. In the simplest case of a convex closed curve on the plane, the properties of the mean curvature flow are described by Gage-Hamilton's theorem. This theorem states that under the mean curvature flow, the curve collapses to a point, and if the flow is diluted so that the enclosed area equals $/pi$, the curve tends to the unit circle. In this book, the author gives a comprehensive account of fundamental results on singularities and the asymptotic behavior of mean curvature flows in higher dimensions.Among other topics, he considers in detail Huisken's theorem (a generalization of Gage-Hamilton's theorem to higher dimension), evolution of non-convex curves and hypersurfaces, and the classification of singularities of the mean curvature flow. Because of the importance of the mean curvature flow and its numerous applications in differential geometry and partial differential equations, as well as in engineering, chemistry, and biology, this book can be useful to graduate students and researchers working in these areas. The book would also make a nice supplementary text for an advanced course in differential geometry. Prerequisites include basic differential geometry, partial differential equations, and related applications.

From reader reviews:

Marie Aultman:

Book is to be different for every single grade. Book for children right up until adult are different content. As you may know that book is very important usually. The book Lectures on Mean Curvature Flows (Ams/Ip Studies in Advanced Mathematics) has been making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The reserve Lectures on Mean Curvature Flows (Ams/Ip Studies in Advanced Mathematics) is not only giving you more new information but also to be your friend when you truly feel bored. You can spend your own spend time to read your guide. Try to make relationship using the book Lectures on Mean Curvature Flows (Ams/Ip Studies in Advanced Mathematics). You never experience lose out for everything should you read some books.

Jeffery Harman:

Nowadays reading books become more than want or need but also become a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The details you get based on what kind of guide you read, if you want have more knowledge just go with schooling books but if you want truly feel happy read one having theme for entertaining for example comic or novel. The Lectures on Mean Curvature Flows (Ams/Ip Studies in Advanced Mathematics) is kind of book which is giving the reader capricious experience.

William Jones:

Many people spending their period by playing outside using friends, fun activity along with family or just watching TV the entire day. You can have new activity to enjoy your whole day by examining a book. Ugh, think reading a book can actually hard because you have to bring the book everywhere? It ok you can have the e-book, getting everywhere you want in your Smart phone. Like Lectures on Mean Curvature Flows (Ams/Ip Studies in Advanced Mathematics) which is getting the e-book version. So , why not try out this book? Let's view.

Mellisa Holden:

Guide is one of source of information. We can add our understanding from it. Not only for students but native or citizen want book to know the up-date information of year in order to year. As we know those ebooks have many advantages. Beside many of us add our knowledge, can also bring us to around the world. With the book Lectures on Mean Curvature Flows (Ams/Ip Studies in Advanced Mathematics) we can have more advantage. Don't someone to be creative people? To get creative person must like to read a book. Simply choose the best book that suitable with your aim. Don't end up being doubt to change your life at this time book Lectures on Mean Curvature Flows (Ams/Ip Studies in Advanced Mathematics). You can more appealing than now.
