The Unification of Strong, Gravitational & Electric Forces Vladimir B. Ginzburg

The concept of spiral field theory was presented by the author in his previous books - "Spiral Grain of the Universe," "Unified Spiral Field and Matter," and "Unified Spiral Nature of the Quantum & Relativistic Universe."

This book further expands the concept of the spiral field that leads to the unification of strong, gravitational and electric forces. The highlights of the book are:

- a) Presentation of new prime elements of Nature, the torix and the helix, based on positive and negative energy;
- b) Description of matter, ether, electromagnetic waves, and neutrinos by the same fundamental equations;
- c) Confirming the possibility of instantaneous transmission of waves;
- d) Unification of strong, gravitational, and electric forces;
- e) Identifying likely candidates for "dark" matter;
- f) Outlining a road map to a unified field theory.
