## Electrotransformation of Bacteria (Springer Lab Manuals)

In this manual, protocols for the transformation of about 40 strains of bacteria are described, with the emphasis placed on the individual critical procedural steps, since the practical details mainly depend on the bacterial strain under investigation. This presentation together with the theoretical introductory chapters, allows users to modify and adapt each protocol to their own experiments. Bacterial strains with relevance in the food industry, biotechnology, medical and veterinary fields, agroindustry and environmental sciences are covered.
