**Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites** Allen W. Hatheway

**Winner of the 2013 Claire P. Holdredge Awardee for *Remediation of Former Manufactured Gas Plants and Other Coal-Tar Sites*.**

*This award, first established in 1962 by the Association of Environmental and Engineering Geologists, is named in honor of Claire P. Holdredge, a founding member and the first President of the Association. The award is presented for a publication by an AEG Member(s) within the 5 previous years that is adjudged to be an outstanding contribution to the Engineering Geology profession.*

**Remediation of Former Manufactured Gas Plants and Other Coal-Tar Sites** is geared toward environmental professionals who want to design and implement gasworks remediation strategies that offer the greatest chance to successfully protect the public. Exploring the bases for selecting remedial alternatives to adequately address today's environmental wounds, this compendium of essential knowledge combines historic and modern scientific data and technology with common sense and empirical lore passed down from past generations of gas professionals, a group that is now all but extinct.

Most of the general population does not have a sufficient understanding of remediation needs. Unfortunately, there seems to be a similar lack of knowledge among some environmental professionals whose job it is to protect the public from the health threats associated with coal tar. Pitfalls in remediation are common and represent a significant risk to the public, especially when processes are based on inaccurate assumptions.

This book sifts through the existing scholarship from around the developed world to present the necessary evaluation factors used in effective remediation. Almost encyclopedic in scope, it offers 265 separate tables with checklists, hard data facts, and associations to help readers define site-specific gas plant conditions. It also includes a plethora of photographs and historic drawings, as well as an extensive glossary that is indispensable for understanding potential and actual gas plant contamination.

Useful for engineers, scientists, regulators, public officials, historians, and journalists among others, this book is intended for those who conduct remediation, as well as those involved in review and oversight. Its goal is to bring users closer to safely reclaiming land and reviving old coal gasworks sites in ways that ultimately will be sustainable for the public interest.

### **From reader reviews:**

#### **Scott Roche:**

This Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites are reliable for you who want to become a successful person, why. The reason why of this Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites can be on the list of great books you must have is actually giving you more than just simple looking at food but feed an individual with information that maybe will shock your prior knowledge. This book is handy, you can bring it everywhere and whenever your conditions in the e-book and printed versions. Beside that this Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites forcing you to have an enormous of experience for example rich vocabulary, giving you test of critical thinking that could it useful in your day exercise. So , let's have it appreciate reading.

#### **Stuart Rosado:**

The book untitled Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites contain a lot of information on this. The writer explains your girlfriend idea with easy technique. The language is very straightforward all the people, so do certainly not worry, you can easy to read the idea. The book was published by famous author. The author gives you in the new era of literary works. You can read this book because you can read more your smart phone, or gadget, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site along with order it. Have a nice go through.

#### **Willa Killeen:**

This Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites is new way for you who has curiosity to look for some information given it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites can be the light food for yourself because the information inside this particular book is easy to get by anyone. These books create itself in the form which can be reachable by anyone, yep I mean in the e-book web form. People who think that in book form make them feel sleepy even dizzy this book is the answer. So there is not any in reading a reserve especially this one. You can find actually looking for. It should be here for an individual. So , don't miss the item! Just read this e-book type for your better life and knowledge.

#### **Lillian Trimmer:**

Reserve is one of source of expertise. We can add our information from it. Not only for students and also native or citizen require book to know the update information of year to year. As we know those guides have many advantages. Beside we add our knowledge, also can bring us to around the world. From the book Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites we can get more advantage. Don't one to be creative people? To be creative person must like to read a book. Just simply choose the best book

that appropriate with your aim. Don't be doubt to change your life at this book Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites. You can more attractive than now.
