Practical Management of Hypertension (Developments in Cardiovascular Medicine)

Practical Management of Hypertension (Developments in Cardiovascular Medicine)

This compact guide on the practical management of the hypertensive individual first saw light in 1990. The underlying concept was, and still is, to produce an easily accessible 'leaf-through' type of mini-textbook on the hypertensive individual's condition and the many dilemmas that surround diagnosis, surveillance and intention to treat or not treat. Our primary aim has been to promote a utilitarian train of thought in the decision-making process in practice, whether general or specialistic. In pursuing this policy, we felt, however, that the terms of practical orientation and advice should be matched, in a concise form, to scientific arguments whenever possible. This cannot always be achieved in reality, so that some chapters unavoidably have a more scientifically-oriented flavour than others. For the 'eager reader' in search of more scientific facts, selected references have been provided. One may rightfully wonder whether such a concept would not turn into a hybrid kind of hypertension guide. And, yes, this booklet has become something of a hybrid, a compromise between an ultra lean and superbly pictorial compendium like the Clinician's Manual on Hypertension (Hansson, 1990) and the ABC of Hypertension (O'Brien et al. , 1995) on the one hand, and full-blown textbooks (e. g. Laragh and Brenner, 1995; Swales, 1995) and even the Handbook of Hypertension Series, Birken hager and Reid (1983 onwards) on the other.

From reader reviews:

Pauline Mueller:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each reserve has different aim or maybe goal; it means that publication has different type. Some people sense enjoy to spend their time and energy to read a book. They can be reading whatever they consider because their hobby will be reading a book. Why not the person who don't like examining a book? Sometime, individual feel need book when they found difficult problem or maybe exercise. Well, probably you will want this Practical Management of Hypertension (Developments in Cardiovascular Medicine).

Maria Smith:

As people who live in typically the modest era should be up-date about what going on or information even knowledge to make these people keep up with the era which is always change and move forward. Some of you maybe will certainly update themselves by reading through books. It is a good choice for yourself but the problems coming to an individual is you don't know which one you should start with. This Practical Management of Hypertension (Developments in Cardiovascular Medicine) is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

Kevin Applegate:

This Practical Management of Hypertension (Developments in Cardiovascular Medicine) is great e-book for you because the content and that is full of information for you who have always deal with world and get to make decision every minute. This book reveal it details accurately using great coordinate word or we can declare no rambling sentences within it. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but tough core information with beautiful delivering sentences. Having Practical Management of Hypertension (Developments in Cardiovascular Medicine) in your hand like keeping the world in your arm, information in it is not ridiculous a single. We can say that no e-book that offer you world throughout ten or fifteen tiny right but this guide already do that. So , this really is good reading book. Hi Mr. and Mrs. busy do you still doubt this?

Beatrice Raybon:

Is it anyone who having spare time then spend it whole day simply by watching television programs or just lying down on the bed? Do you need something totally new? This Practical Management of Hypertension (Developments in Cardiovascular Medicine) can be the reply, oh how comes? The new book you know. You are consequently out of date, spending your time by reading in this fresh era is common not a geek activity. So what these textbooks have than the others?
